SOVIET AUTOMATIC CONTROL

CONTENTS FOR 1984

Number 1

	English Page	Russian Page
METHODS OF INFORMATION PROCESSING		
M.V. Lashauri, Yu.S. Natkovich and N.N. Todua: On Converting Geographical Coordinates to Rectangular Cartesian Coordinates and Conversely	1	3
IDENTIFICATION OF COMPLEX SYSTEMS		
A.G. Ivakhnenko, S.F. Kozubovskiy, T.I. Strokova, I.K. Timechenko and V.V. Osipenko: Inverse Transformation of Probability Characteristics into the Original Realization of a Random Process as a Means of Forecasting and Extrapolation	7	9
L.M. Boychuk and T.A. Chikhradze: Determination of Regulatable Relations Between Output Variables of Technological Processes by Orthogonal Regression	19	22
O.F. Dubrovin and L.F. Khilyuk: On the Structures of Simulation Models of the Dnieper Basin Water Management Complex	23	26
V.S. Kitot': Planning of Experiments in Self-Organization of Mathematical Models	29	32
V.G. Raskin and L.P. Yanovskiy: Choosing a Regression Model of Optimal Complexity Using the Regularity Criterion	36	40
ADAPTIVE CONTROL		
Cao Tien Guinh: Synthesis of Adaptive Control Systems for Objects with Lag	40	44
ROBOTS, ARTIFICIAL INTELLIGENCE, AND ERGATIC SYSTEMS		
V.V. Pavlov and A.N. Voronin: Multicriterion Synthesis of Exterior Space Infrastructure in an Intelligent Robot	45	49
CONTROL SYSTEMS		
P.T. Berezanskiy, A.I. Kochubinskiy and F.S. Payanov: Operating Modes and Main Characteristics of an Automatic Quarry Process Control System Using Mathematical Modeling	54	59
BRIEF NOTES		
Yu.V. Koppa, A.V. Kureyshevich and M.N. Pakhomova: Modeling the Dependence of Biomass of Phytoplankton and Content of Chlorophyll A	61	67
V.N. Lopin: The Conveyer Principle of Data Processing on Grids of Threshold Elements	66	71
D.I. Zelinskiy: The Influence of Signal Correlation on the Reliability of Reception Using Multiposition Frequency Modulation in the Case of Multiplicative Noise	69	73
V.N. Ivanchenko, N.N. Lyabakh, A.G. Kul'kin and Yu.A. Samoylenko: Automatic Control Systems for Railway Transport	73	76
S.V. Radilov: Monitoring the Melt Level in a Blast Furnace Hearth	76	79
O.N. Solomakha: Synthesis of Discretely Coinciding Models on Sets of Solutions of Inverse Problems	79	82

	English Page	Russian Page
DISCUSSION		
M.A. Karpinskiy: Nonlinearity and Anisotropy of an Inertial Field.....	83	85

Number 2

A.I. Kukhtenko: The Basic Steps in the Development of Invariance Theory.....	1	3
DATA PROCESSING METHODS		
V.I. Vasil'ev: Simplicity of Decision Functions in Training for Pattern Recogntiion.....	11	14
B.B. Dunayev: Minimax Classification of Patterns with Random Indepedent Parameters.....	19	23
IDENTIFICATION OF COMPLEX SYSTEMS		
A.G. Ivakhnenko, B.K. Svetal'skiy, A.P. Sarychev, I.A. Denisova, L.A. Sirenko, E.P. Nakhshina and A.K. Ryabov: Objective Systems Analysis and Two-Level Long-Range Forecast for the Ecological Systems of Kakhovka and Kremenchug Reservoirs.....	26	30
V.M. Pinchuk and L.M. Boychuk: The Frequency Approach to the Synthesis of Finite Discrete Functional Volterra Series for Prediction Purposes.....	37	42
DYNAMICS OF CONTROL SYSTEMS		
B.B. Timofeyev and V.D. Fridshtand: Synthesis of Suboptimally-Fast-Action Algorithms for the Control of a Class of Nonlinear Plants.....	43	48
CONTROL IN BIOLOGY, ECOLOGY AND MEDICINE		
V.I. Belyayev: Mathematical Simulation of Processes of Diffusion of Non-conservative Particles in Ecological Systems.....	53	58
TECHNOLOGICAL MEANS OF CONTROL		
A.P. Andrushchenko: Controllability of a Quantum Anharmonic Oscillator.....	60	66
N.V. Nesterenko and Yu.S. Yakovlev: On Design Features of Microprocessor Devices for Periphery Control.....	67	74
BRIEF NOTES		
A.L. Kurakin and B.S. Fleyshman: Two Variants of the Implementation Functions.....	73	81
B.Yu. Mandrovskiy-Sokolov: Control of a Nonlinear Static Object with Several Controlled Coordinates and a Single Controlling Action with Optimization of the Approximation Criterion.....	76	83
V.V. Pavlov and V.V. Kazakov: Dynamic-Accuracy Decomposition of the Principle of Functional Man-Machine Compatibility.....	80	86
V.N. Stepanenko: A Numerical Method for Modeling Transfer Processes on the Basis of Hydraulic Analog.....	83	88
Yu.N. Chekhovoy: Stability of Discrete Automatic Systems Containing Nonlinear and Quasilinear Blocks.....	86	90

Number 3

DATA PROCESSING METHODS		
A.B. Glaz: Use of Self-Organization Principles for Constructing Decision Rules on Insufficient Training Samples	1	3
IDENTIFICATION OF COMPLEX SYSTEMS		
A.G. Ivakhnenko and G.I. Krotov: A Multiplicative-Additive Nonlinear GMDH Algorithm with Optimization of the Power of Factors	10	13

	English Page	Russian Page
A.V. Globa and V.S. Kikot': Identification of Forms of Dependence of the Components of Cutting Forces Using the Group Method of Data Handling	16	19
I.S. Durgaryan and F.F. Pashchenko: Application of Informational Criteria in Identification	19	22
O.A. Dyshin, M.I. Mamedov and G.A. Gyul'mamedov: Self-Organization of a Model with the Use of Factor Analysis	28	31
V.S. Stepashko and Yu.L. Kocherga: Classification and Analysis of the Noise Immunity of External Criteria for Models Selection	36	38
T.I. Strokova and V.I. Cheberkus: Investigation of the Algorithm for Inverse Transformation of a Covariance Function into a Quantitative Prediction	48	50
CONTROL SYSTEM DYNAMICS		
V.A. Krotevich: Analytical Design of a Discrete Control for Programmed Loading of Structures	55	58
ADAPTIVE CONTROL		
G.M. Bakan, V.V. Volosov and E.A. Nizhnichenko: On the Solution of the Filtering Problem under the Conditions of Nonstochastically Specified Indeterminacy	62	65
RELIABILITY AND TECHNICAL DIAGNOSTICS		
P.I. Kuznetsov, L.A. Pchelintsev and V.A. Denisov: Choosing the Instant of Start of Servicing	72	74
BRIEF NOTES		
A.N. Antamoshkin, T.A. Zaytseva and O.N. Korsakova: Formalization of Optimization Problems in Planning Agricultural-Industrial Combines	75	77
R.I. Belitskiy and A.V. Palagin: A Simplified Model of an Asynchronous Multi-Processor	78	79
A.Ya. Lashchev: Raising the Quality of Transient Processes of Adaptation in Systems with Quadratic Criterion	83	84
P.M. Marchenko: Synthesis of a Model of Control of the Process of Rolling by the Group Method of Data Handling (GMDH)	87	88

Number 4

INFORMATION PROCESSING METHODS		
A.F. Zaritskiy, V.I. Vodolazkiy and V.A. Stanovova: Use of the N-Diameter in Pattern Recognition Problems	1	3
IDENTIFICATION OF COMPLEX SYSTEMS		
A.G. Ivakhnenko, Yu.V. Koppa and Yu.V. Kostenko: Systems Analysis and Long-Range Quantitative Prediction of Quasi-Static Systems on the Basis of Self-Organization of Models. Part 3. Separation of Output Variables according to Degree of Exogenicity for Restoration of the Laws Governing the Modeling Object	7	10
A.G. Ivakhnenko, G.I. Krotov and T.I. Strokova: Self-Organization of Dimensionless Harmonic-Exponential and Correlation Predicting Models of Standard Structure	15	18
A.V. Primak: A Methodology for Design and Development of Automatic Systems for Air Quality Monitoring and Control	27	30
OPTIMAL CONTROL		
L.M. Boychuk and N.V. Popkov: A Method of Automatic Scanning of a Pareto Region in Multicriterial Optimization Problems	36	39

	English Page	Russian Page
L.L. Voznyuk and V.S. Mel'nik: Optimal Control of Dynamical Systems with Constraints on the Controls and the Phase Variables	46	48
V.I. Dolya: An Adaptive Algorithm for Optimal Planning of Oil Refinery Output	51	53
V.A. Yatsenko: Dynamically Equivalent Systems in the Solution of Certain Optimal Control Problems	57	59
BRIEF NOTES		
L.A. Bakayev, G.V. Bondarenko, A.B. Voronova and R.P. Kramarenko: Generator "DISMEM" of Complex Macro-Econometric Models	63	66
A.N. Voronin: A Stochastic Problem of Multicriterial Optimizations	67	69
V.A. Vyshinskiy: On One Universal Algorithmic System	70	71
S.F. Kozubovskiy, V.V. Kupriyanov and B.V. Suvorov: Optimization of the Time of Monitoring of a Nonstationary Process	73	74
M.V. Kuntsevich: Automation of the Design of Automated Teaching Systems — Synthesis of Their Structures	77	77
T.G. Kryzhanovskaya, V.A. Stepanov and A.L. Simonov: Process Identification by Multilayer Statistical Decision Theory	81	81
V.P. Puzanov and N.N. Solomko: Modeling the Process of Caking of an Agglomerate Charge	84	83
A.P. Sarychev: A Multilayer Nonlinear Harmonic GMDH Algorithm for Self-Organization of Predicting Models	90	88

Number 5

INFORMATION PROCESSING METHODS		
A.P. Sarychev: Stable Estimation of the Coefficients in Multilayer GMDH Algorithms.	1	3
IDENTIFICATION OF COMPLEX SYSTEMS		
A.G. Ivakhnenko and V.V. Osipenko: Prediction of Rare Events on the Basis of a GMDH Algorithm	6	8
V.Ye. Nabivach and V.V. Udilov: Identification of Singularities in Estimation of the Quality of the Transitional Characteristics of Linear Automatic Control Systems with Stationary Parameters	11	12
Ye.A. Nizhnichenko: Identification of the Parameters of a Linear Static Object in the Case of Inexactly Realizable Controls	19	20
V.S. Stepashko: Noise Immunity of Choice of Model Using the Criterion of Balance of Predictions	27	27
DYNAMICS OF CONTROL SYSTEMS		
A.P. Andrushchenko: Controllability of a Three-Level Quantized System in Strong Fields.	37	38
A.G. Ivakhnenko and L.M. Boychuk: Integral Invariants in Modelling Multidimensional Linear Dynamical Systems	42	42
V.M. Marchuk and Yu.I. Samoylenko: On the Dynamics of a Compensator of Inductive Load of a Circuit	48	47
G.K. Roginskiy and A.A. Tunik: Modification of Algorithms of Stochastic Approximation for Control in a Bounded Region	51	50
CONTROL IN BIOLOGY, ECOLOGY AND MEDICINE		
Yu.L. Kocherga and V.I. Cheberkus: Prediction of the Climatic and Anthropogenic Components of Ground Water Level and Its Verification	55	54
B.I. Yatsalo: The Dynamics of Ecological Systems of the Strange Attractor Type	64	63

	English Page	Russian Page
BRIEF COMMUNICATIONS		
A.M. Bukchin: Integral Service and Aging of Messages in an Information Network	70	69
N.K. Zherdev: A Combined Method for Failure Prediction	74	72
A.P. Kritskiy: On Numerical Solution of Algebraic Equations	79	76
N.A. Semenov: An Algorithm for Constructing a Multi-Factor Regression Model by the Modified Brandon Method	84	80
V.V. Khubayev: On Basic Potential Tendencies in Agricultural and Ecological Systems	87	82
DISCUSSION		
G.V. Babikov: On the Choice of Prerequisites of Mathematical Modeling of Real Demographical Processes	91	86

Number 6

METHODS OF INFORMATION PROCESSING		
A.G. Ivakhnenko, A.P. Sarychev, and B.K. Svetal'skiy: Determination of the Basis Set of Observable Variables in the Problem of Water Quality Control	1	3
Yu.V. Koppa and L.A. Sirenko: Clusterization of Curves of Chlorophyll Concentration Distribution with Depth	6	8
OPTIMAL CONTROL		
O.V. Babak: Synthesis of a Mathematical Model of an Object and Finding Optimal Operating Conditions with a Limited Amount of Experimental Data	11	13
V.M. Voynalovich: Coordination of Efficient Solutions in Hierarchical Multicriterial Systems	17	19
V.S. Ponomarenko: A Method of Fast Localization of Preferences of an Expert on a Connected Pareto Set (Theoretical Foundations).	26	27
CONTROL IN BIOLOGY, ECOLOGY AND MEDICINE		
R.V. Belyakov: Artificial Muscles as Sensors for Automatic Control of Liquid Media	34	34
ROBOTS, ARTIFICIAL INTELLIGENCE AND ERGATIC SYSTEMS		
I.P. Zhigan and V.F. Morozov: On the Problem of Combining Automatic and Manual Control Systems	41	40
V.V. Pavlov and A.N. Voronin: The Method of Potential Functions for Coding Constraints of the External Space in an Intelligent Mobile Robot	45	43
AUTOMATION OF PLANNING AND SCIENTIFIC INVESTIGATIONS		
Yu.P. Zaychenko and A.V. Shvetsov: Locating Computer Facilities in the Territory of an Economic Region	52	50
BRIEF NOTES		
L.N. Blokhin: A Spectral Method of Optimal Estimation of the State of a Complex Unstable Object Under Random Influences	59	57
L.M. Boychuk, N.A. Ivakhnenko, and V.G. Putyatin: Optimal Weights for a Digital Predicting Filter	63	59

	English page	Russian Page
V.G. Sevast'yanov: An Optimization Method for Solving Multidimensional Inverse Heat-Flow Problems in an Extremal Posing	67	62
P.M. Talanchuk, V.V. Sergeyev, and M.N. Fomin: Hybrid Methods in Planning Solid-Body Gas-Sensitive Transducers	74	68
D.Ya. Khusainov, Yu.A. Komarov, and Ye.A. Yun'kova: Constructing Optimal Lyapunov Functions for Linear Differential Equations	80	72
Yu.N. Chekhovoy: Stability of Nonlinear Dynamical Systems with Quasi-Linear Blocks	84	75
I.O. Shurchkov: Allowance for Measurement Accuracy in Monitoring Parameters of Large-Scale Integrated Circuits	87	78
